WHITE PAPER

May 10, 2021

What Is VeganWorld (VEGAN)?

Veganworld is a new cryptocurrency that aims to help global associations in favor of animal protection and respect for the environment. It was created on May 07, 2021 and deployed on the Binance Smart Chain blockchain.

The actual market cap is around 67.451.429\$ for 1.000.000.000 tokens supply.

Who Are the Founders of VeganWorld?

Veganworld is a stable cryptocurrency designed and created by Gabriela and Tim Dompár, a Franco-Argentinian couple. Gabriela has been vegan for over 20 years and deeply involved in the animal cause and the protection of animals of all species. Tim has been vegan for 10 years and is seriously involved in the protection of the environment and is in close relationship with several global organizations for the respect of our oceans and flora and fauna.

What Makes VeganWorld Unique?

Veganworld is the first cryptocurrency which is in direct relation with organizations and which will allow them to recover the profits made by the sale of tokens.

In France and Argentina, we have local contacts who are invested full time in the fight against global warming, and shelters for abandoned or lost animals.

The Brigitte Bardot Foundation will be a partner of VeganWorld in order to promote the VeganWorld project and thus increase sales to help other associations.

Our Website:

We have launched a website in 4 languages (English, French, German and Spanish) which makes it possible to publicize the project, and to explain how to buy our cryptocurrency. For the moment, the procedure is a bit complex, for that we would like to be listed on more qualitative exchanges. The URL is <https://veganworld.io>

How Many VeganWorld (VEGAN) Coins Are There in Circulation?

There is today a supply of 1000000000 VEGAN available. This supply is capped so no more coins will be created. Very few coins are in circulation right now, as the token is brand new.

You can see here the details of our cryptocurrency ->

Where Can You Buy VeganWorld token?

For the moment, Veganworld is available only on very few exchange like pancake swap. So you can trade it or buy with any other BSC token.
